

1 **Abstract of the Disclosure**

2 A system and method for storage and retrieval of information subject to authorization by a data
3 controller that allows information for purchasing and other information exchange to occur only for
4 authorized parties. A data subject place information about the data subject into a data repository
5 controlled by a data controller. The data controller authorizes a data recipient to obtain that data subject
6 data when authorized by a data subject. Such transactions as purchases of goods and services and
7 applying for college admission are the types of trans actions contemplated. The data repository places
8 client software on the computer of the data recipient thereby signifying that the data recipient is
9 authorized. Thereafter, the data recipient can receive information about the data subject when the data
10 subject accepts and offer from the data recipient.
